### Introduction

The molecular weight of phenol phthalein is 318.32, the molecular formula is C<sub>20</sub>H<sub>14</sub>O<sub>4</sub>, and the CAS number is 77-09-8. Phenol phthalein is almost insoluble in water, and the color change pH range of phenol phthalein is 8.2-10.0. Therefore, phenol phthalein can only detect alkali but not acid. Phenol Phthalein Indicator Solution is composed of phenol phthalein, ethanol, deionized water, etc. It is colorless in acid and neutral solution, and purplish red in alkaline solution.

### Protocols(*for reference only*)

1. Operate according to the experimental requirements.
2. The color change pH range of phenol phthalein is 8.2-10.0. The color changes from colorless to red.
